BRD Requirements Analysis — RTB v1.1

Source: `RTB requirement list v.1.1.xlsx` Sheet1 Analysis Date: 2026-03-31

Legend

Symbol	Meaning
✅	Already exists in codebase
🟡	Partially exists / needs minor work
🔨	Needs new development
⬜	Next Phase / TBC (not Phase 1)

Difficulty: Low (< 2 days), Medium (2–5 days), Hard (1–2 weeks), Very Hard (2+ weeks)

Product Master (#1–#7)

#	Requirement	Status	Difficulty	Notes
1	Create product master ตาม Odoo standard	✅ **Exists**	—	`product.template` with `rent_ok`, pricing rules, deposit flag
2	Custom fields เพิ่มจาก standard	⬜ Next Phase	Low	Just adding fields to product template
3	Maintain article master (key-in & upload)	✅ **Exists**	—	Odoo standard import + manual form
4	Step price ตาม standard (daily, 3-day, weekly, 2-week)	✅ **Exists**	—	`product.pricing` + `sale.temporal.recurrence` supports all these units
5	Step price นอกเหนือ standard	⬜ Next Phase	Low	Just add more recurrence records
6	Auto sync product master จาก SAP	⬜ Next Phase	**Very Hard**	Full SAP integration needed
7	Tax setup per product	✅ **Exists**	—	Odoo standard fiscal position + tax system, `l10n_th` included

---

Inventory Management (#8–#10)

#	Requirement	Status	Difficulty	Notes
8	Serial number tracking	✅ **Exists**	—	Full M2M `pickedup_lot_ids` / `returned_lot_ids`, wizard support
9	Lock serial number จากการเช่า	🔨 **New**	**Medium**	Need `rental_status` field on `stock.lot` (available/damaged/inspection/locked) + domain filter in wizard
10	Inventory แยกสาขา	⬜ Next Phase	**Hard**	Multi-warehouse + inter-branch transfer workflow

Customer Master (#11–#14)

#	Requirement	Status	Difficulty	Notes
11	Create customer profile ตาม Odoo standard	✅ **Exists**	—	`res.partner` standard
12	Custom fields for customer	⬜ Next Phase	Low	Just adding fields
13	Connect customer DB จาก GWL	⬜ Next Phase	**Very Hard**	External integration
14	Multiple contacts under 1 customer	✅ **Exists**	—	Odoo standard `parent_id` / child contacts

Rental Process (#15–#17)

#	Requirement	Status	Difficulty	Notes
15	Check stock availability ก่อน create customer	✅ **Exists**	—	Gantt schedule + product qty_in_rent
16	Generate quotation PDF	🟡 **Partial**	**Medium**	Odoo standard quotation PDF exists, but custom layout/branding likely needed
17	Confirm quotation & reserve at serial level	✅ **Exists**	—	Confirmation + serial assignment in pickup wizard

Rental Process — Payment (#18–#30)

#	Requirement	Status	Difficulty	Notes
18	Payment: credit card, QR, 2c2p, EDC	🔨 **New**	**Hard**	Payment is currently manual; no EDC/2c2p integration. Phase 1 is manual ref keying only

#	Requirement	Status	Difficulty	Notes
19	Manual key rental ref on 2c2p link	🔨 **New**	**Low**	Just a text field on SO for `payment_ref_2c2p`
20	Store 2c2p ref in rental payment field	🔨 **New**	**Low**	Same as #19 — add field + view
21	Manual key rental ref on EDC	🔨 **New**	**Low**	Text field `edc_payment_ref` on SO
22	Store EDC ref for deposit hold	🔨 **New**	**Low**	Text field `edc_deposit_ref` on SO
23	Generate documents: ABB, Receipt/Tax Invoice (original+copy), สัญญาเช่า (original+copy), ใบตรวจรับ	🟡 **Partial**	**Hard**	Only pickup receipt report exists. Need 4+ new QWeb report templates with original/copy headers
24	Pre-fill customer data in documents	⬜ Next Phase	Low	Standard QWeb capability once reports are built
25	ABB registration number	🔨 **New**	**Low**	Config field for ABB registration + use in report template
26	Select contact for tax invoice	✅ **Exists**	—	Odoo standard `partner_invoice_id` on SO
27	Upload related documents	✅ **Exists**	—	Odoo standard `ir.attachment` / chatter
28	Digital signature on documents	✅ **Exists**	—	Odoo standard sign module or portal signature
29	Void (return same day as payment)	⬜ Next Phase	Medium	
30	Refund (return different day)	⬜ Next Phase	Medium	Deposit credit note exists, but full rental refund flow doesn't

Rental Return Process — Payment (#31–#39)

#	Requirement	Status	Difficulty	Notes
31	Manual key-in ค่าปรับ (penalty)	✅ **Exists**	—	Auto-calculated delay fee line in return wizard

#	Requirement	Status	Difficulty	Notes
32	Manual key-in ค่าเสียหาย/สูญหาย	✅ **Exists**	—	Damage fee in return wizard with `rental.damage.log`
33	Manual key-in deposit refund net amount	✅ **Exists**	—	Auto-calculated proportional deposit credit note
34	Formula/step penalty calculation	⬜ Next Phase	Medium	Currently simple daily+hourly; need rule-based formula engine
35	Formula/step damage fee calculation	⬜ Next Phase	Medium	Currently manual entry; need predefined damage fee schedules
36	EDC refund processing (manual, no system link)	🟡 **Partial**	**Low**	Process is outside system; just need a field to log EDC refund ref
37	Generate ใบรับคืนสินค้า (return receipt)	🔨 **New**	**Medium**	New QWeb report template needed
38	Generate ใบเสร็จ for penalties/damage	🔨 **New**	**Medium**	New QWeb report or extend invoice template
39	Upload return documents	✅ **Exists**	—	Odoo standard attachments

Accounting Posting (#40–#42)

#	Requirement	Status	Difficulty	Notes
40	Generate file for SAP upload	🔨 **New**	**Hard**	Need SAP file format spec, export wizard, scheduled job
41	Auto-connect to SAP for posting	⬜ Next Phase	**Very Hard**	Full SAP API integration
42	Post under company KPC	🟡 **Partial**	**Medium**	Multi-company exists; need SAP config mapping for KPC

Sales Process (#43–#47)

#	Requirement	Status	Difficulty	Notes
43	Buy without prior rental	⬜ TBC	**Medium**	Standard Odoo sale flow works, but needs process definition
44	Sales process support	⬜ TBC	**Medium**	Need defined process before building
45	Depreciation calculation for sale price	⬜ TBC	**Hard**	Need depreciation formula, product master fields, computation logic

#	Requirement	Status	Difficulty	Notes
46	EDC ref for sales	⬜ TBC	Low	Same pattern as rental EDC ref
47	Generate sales documents	⬜ TBC	Medium	Report templates once process is defined

Reporting (#48)

#	Requirement	Status	Difficulty	Notes
48	Standard Odoo reports	🟡 **Partial**	**Medium**	`sale.rental.report` SQL view exists (daily analysis). Need to confirm if additional reports are required

System Integrations (#49–#53)

#	Requirement	Status	Difficulty	Notes
49	LINE OA integration	⬜ Next Phase	**Very Hard**	Full messaging platform integration
50	EDC/2c2p auto integration	⬜ Next Phase	**Very Hard**	Payment gateway integration
51	SAP auto integration	⬜ Next Phase	**Very Hard**	ERP-to-ERP
52	GWL auto integration	⬜ Next Phase	**Very Hard**	External system
53	Onetrust integration	⬜ Next Phase	**Very Hard**	Consent management

RBAC (#54)

#	Requirement	Status	Difficulty	Notes
54	Role-based access per BU/level	🟡 **Partial**	**Medium**	Basic Salesman/Manager roles exist. Need BU-specific groups + record rules

└──────────────────────────────────────────────────────────┘
```

Key Observations

1. **Core rental workflow is solid** — product master, pricing, serial tracking, pickup/return, deposits, damage, and late fees are all built.
2. **Biggest Phase 1 gaps** are around **document generation** (#23, #37, #38) and **payment reference tracking** (#19–22). Documents are the hardest since they need business-approved templates.
3. **SAP file export** (#40) is a known hard item — blocked until file format spec is provided.
4. **Serial locking** (#9) is a natural extension of the existing `stock.lot` damage tracking — medium effort.
5. **Next Phase items** are dominated by **external integrations** (SAP, LINE OA, EDC, GWL, Onetrust) — each is a project in itself.
